Experience

Amnex Infotechnologies

Oct 2023 – Present

Software Developer

Delhi

- Spearheaded the development and implementation of a critical **Government of India** project, GCES, focusing on leveraging farmers' daily data to assess national food supplies for import and export.
- Utilized **Angular** to design and construct a user-friendly interface, streamlining data visualization and interaction.
- Engineered **stored procedures** for optimized data retrieval and manipulation, enhancing the efficiency of data processing using **postgres**.

Digilytics.ai

May 2022 – May 2023

Full Stack Developer

Remote

- Developed and maintained Java-based web applications using Spring Boot Framework, and JavaScript for clients like **Dabur, Bajaj, Omni**, etc.
- Automated the manual calling between the agents and clients using APIs, **Highchart**, and **JQgrid library** which helped in saving time for 1000s of agents and clients and cut down manual calling by **75%**.
- Engineered Analytical system for web-app development using **JavaScript, JQuery**, and cutting front-end development that reduces manual manpower.
- Explored ways to visualize and send a daily report of test results to team members using **HTML, Javascript, and CSS**.
- Collaborated with team members using version control systems such as **Git** to organize modifications and assign tasks.

Cloud Analogy

Feburary 2022 – March 2022

Salesforce Developer Trainee

Noida

- Demonstrated strong problem-solving skills, attention to detail, and the ability to learn quickly in a fast-paced environment.
- Learned and built tech logic with **Apex, JavaScript, and trigger**.

K S Hospitality Services PVT. LTD.

July 2019 – August 2020

Web-App Developer

Delhi

- Developed and coded responsive web pages using HTML, CSS, **Java, Springboot**, and JavaScript.

Technical Skills

Languages: Java, HTML/CSS, JavaScript.

Developer Tools: IntelliJ, Post-man, Jira, Sublime Text, VS Code, GitHub, Eclipse

Technologies/Frameworks: Springboot, Spring-MVC, MySQL, PostgreSQL, Data Structures and Algorithms, Microservices, Angular, Kafka and MongoDB

Projects

E-Commerce Application | Spring Boot, Thymeleaf, MySQL, Swagger

January 2023

- A full stack web application where customers can browse through products and add items to their cart.
- The application includes product listings as well as shopping carts.
- The authentication part is being worked on.

Online Shopping Platform (Microservices) | Spring Boot, Spring Cloud, MySQL, MongoDB, Kafka

September 2023

- A project that is mainly focused on the architecture of Microservices.
- Includes synchronous and asynchronous communication using **Kafka and Resilience4J**.
- Contains 6 services- order, inventory, product, notification, discovery server, and API gateway service.
- Order, inventory, and notification service interact with each other.
- Discovery server acts as the Eureka server whereas other services act as Eureka clients.
- Currently Integrating **Docker**.

Flight Information | Spring boot and Swagger

August 2023

- Integrated a third-party API to fetch flight data such as departure times, arrival times, destinations, and flight status.
- Designed and implemented a user-friendly front-end using Thymeleaf templates to display the fetched flight information.

Education

Graphic Era University

June 2020 – June 2022

Master of Computer Application

Dehradun, Uttarakhand

Acharya Institute of Graduate Studies

June 2015 – June 2019

Bachelor of Computer Application

Bangalore, Karnataka
